Smart Hybrid Light Technology

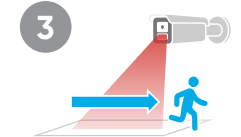

Switches between IR and white light when a **human** or **vehicle** enters the field of view:

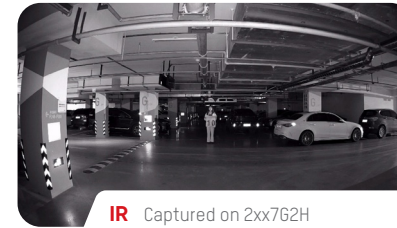

1
IR is switched on when there is no target

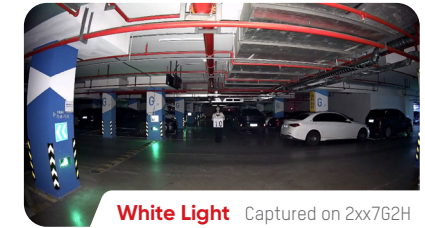

2
White light is activated when a person or vehicle enters the target area

3
Switches back to IR when the person or vehicle leaves the target area

IR Captured on 2xx7G2H

White Light Captured on 2xx7G2H

Professional Performance

Hybrid-Light Illumination

Flexible lighting options - IR mode, White Light Mode and Smart Mode

F1.0 Confocal Lens

Sets the standard for sharply-focused images

ColorVu Technology

View in full-colour, 24 hours a day
